

The **Sliding Ruler** slips onto the 12" large Scor-it Board and allows you to create perfect dry embossed diamonds, rectangles, grids and starbursts. It creates consistent starting and stopping points for any design. Inch and metric measurements are precisely scribed onto one ruler so it fits both large inch and metric Scor-it Boards.

- slide the ruler onto the Scor-it Board, from the bottom, using either inches or centimeters.
- if the ruler is too snug or too loose, remove the ruler and simply bend the ruler slightly to either loosen or tighten.
- you can now create perfect embossed diamonds, rectangles, starbursts and more by being able to measure both the top and bottom of your paper.
