

Scor-it Sliding Ruler / Instructions for making a starburst...

We started with a 5" square piece of card stock and will make ¼" embossed lines for our starburst. You may choose to use different sized paper and width for your starburst. You also don't have to start in the middle of the sheet as we did – you can start at a corner for example.

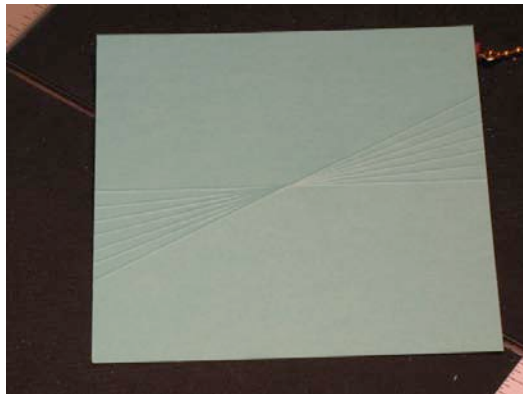

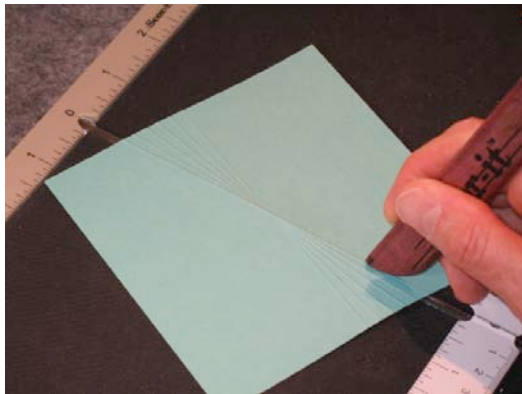

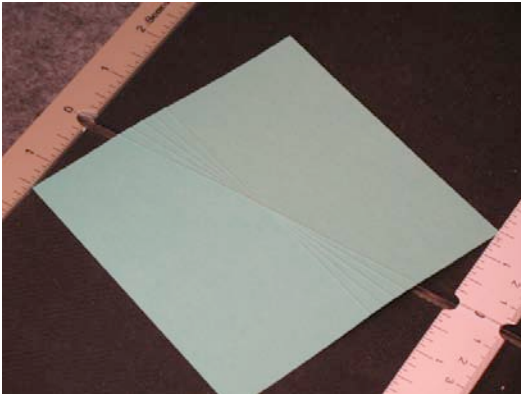

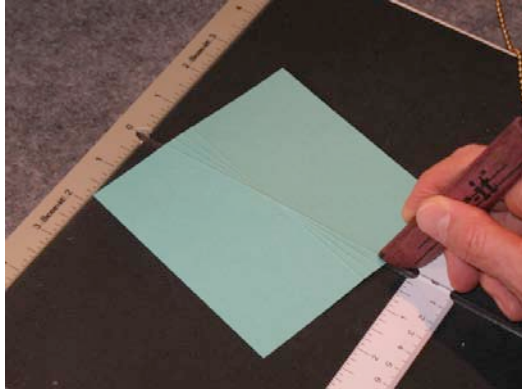

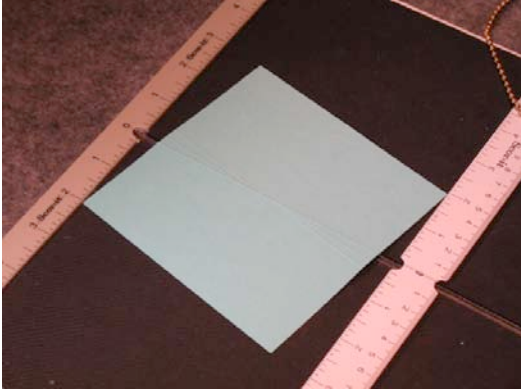

- we centered our sheet at 2 ½" and made the first embossed line.

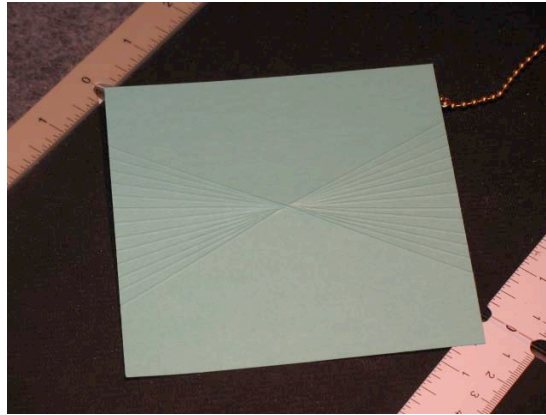

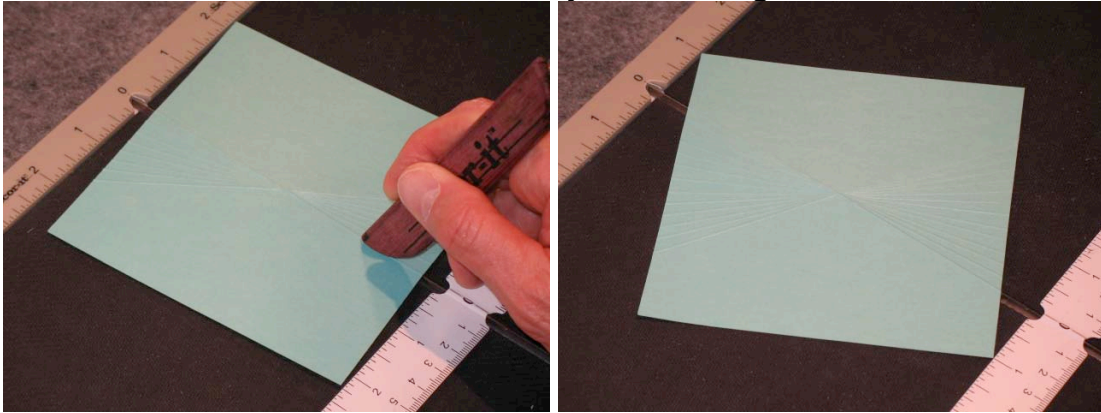

- to make the second embossed line we moved the paper ¼" to 2 ¼" at the top and the opposing corner to 2 ¼" on the Sliding Ruler at the bottom.

- continue to move the paper in $\frac{1}{4}$ " increments and emboss. We embossed until we came to 1" and stopped – you may choose to continue all the way around.

- to complete our starburst, simply move the upper right hand corner to 2 ¼" at top and bottom and continue in ¼" increments until you reach 1" again.

- you can also turn the paper and add a starburst using the other two sides of the paper.
